### City of Markham

*Summer Camp Volunteer*

- Led and facilitated various activities and events, creating an engaging and positive experience for campers throughout the summer
- Supported understaffed programs by assisting with activity preparation

Markham, ON

Jul 2019 — Aug 2019

Jul 2018 — Aug 2018

## PROJECTS

### Medieval Clicker

- Developed a browser-based game using React, HTML, CSS, and JavaScript where players defeat enemies to earn gold and purchase upgrades
- Implemented persistent game-state storage using browser local storage, enabling players to retain their progress across browser sessions

Jun 2023 — Sept 2023

### NBA Statistic Graph

- Collaborated with a partner to develop a Python-based data analysis program using career data from the top 75 NBA players in history
- Implemented a weighted scoring system based on individual awards to quantify and compare player career achievements
- Built an interactive GUI with filtering functionality, allowing users to analyze players by career era and overall score

Feb 2023 — Mar 2023

### Medieval Tower Defense

- Developed a Java-based tower defense game featuring eight unique tower types designed to prevent enemies from reaching the player's base
- Designed and implemented custom game assets, including tower, enemy, and map sprites, to create a cohesive themed gameplay experience

Sept 2020 — Jan 2021
